## BLOOD GROUP AND IDENTITY MARKER REPORT

JEANETTE TRILLINGSGAARD BRUNSBORGVEJ 2 DK-7570 VEMB DENMARK	<b>Case:</b> <b>CAT64341</b> <b>Date Received:</b> 07-Apr-2014 <b>Print Date:</b> 28-Apr-2014 <b>Report ID:</b> 8510-5565-1927-8142 Verify report at <a href="http://www.vgl.ucdavis.edu/myvgl/verify.html">www.vgl.ucdavis.edu/myvgl/verify.html</a>
<b>Cat:</b> DK KORZHIK'S MARIKIX <b>DOB:</b> 03/14/2013 <b>Sex:</b> Female <b>Breed:</b> Kurilean Bobtail Longhair <b>Microchip:</b> 208213990196086	<b>Reg:</b> FD LO 213594
<b>Sire:</b> DK JEATRI'S FERNRVERKBAU 2700 <b>Dam:</b> DK JEATRI'S DIAMOND LINE	<b>Reg:</b> 208213990114363 <b>Reg:</b> 208213990152993

## AB BLOOD GROUP RESULT

N/N

### Result Codes:

- N/N Cat is Type A or Type "AB"  
 N/b Cat is a carrier of B factor; serotype could be Type A or Type "AB"  
 b/b Cat is Type B

The genetic test for the cat blood group identifies the recessive **b** allele which is associated with the B serotype. Cats with two copies of the **b** allele have the Type B blood group. Cats with one copy of the **b** allele can also be distinguished. These cats can have blood group A or the rare blood group "AB". Because the genetic test cannot distinguish between a Type A versus a Type "AB" cat, the **non-b** allele is reported as "N". The cat could have a Type A or Type AB serotype. This test has been validated for domestic cat breeds only. The accuracy of results for wildcat hybrids has not been determined. For further information on the AB blood group test please visit the VGL website at: <http://www.vgl.ucdavis.edu/service/cat/bloodgroup.html>.
